Reimbursement Policy ID: RPC.0068.7700

Recent review date: 04/2025

Next review date: 01/2026

*AmeriHealth Caritas Ohio reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. AmeriHealth Caritas Ohio may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.*

*In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including Current Procedural Terminology (CPT); the Healthcare Common Procedure Coding System (HCPCS); and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM), and other relevant sources. Other factors that may affect payment include medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, and other health plan policies, and other relevant factors. These factors may supplement, modify, or in some cases supersede reimbursement policies.*

*This reimbursement policy applies to all health care services billed on a CMS-1500 form or its electronic equivalent, or when billed on a UB-04 form or its electronic equivalent.*

## Policy Overview

This policy describes the reimbursement guidelines for submitting claims for obstetrical services, including antepartum, delivery, anesthesia and postpartum services. The policy also addresses the maternity authorization waiver.

## Exceptions

N/A

## Reimbursement Guidelines

Pregnancy related services are reimbursable when claims are submitted accordingly. Services include education, care coordination, counseling, high risk monitoring, nurse midwife services, preconception care, prenatal care, ultrasounds (see RPC.0038.7700), prenatal risk assessment, delivery, and transportation. This policy describes the reimbursement guidelines for submitting claims for obstetrical services, including antepartum, delivery, anesthesia and postpartum services.

A Primary Care Provider (PCP) can serve as the member's personal practitioner and is responsible for coordinating and managing the medical needs of AmeriHealth Caritas Ohio members. Advanced nurse practitioners, nurse midwives, and licensed physicians in the following specialties may serve as Plan PCPs:

- General Practice
- Pediatrics
- Internal Medicine
- Geriatrics
- Obstetrics/gynecology (OB/GYN)
- Family Practice

#### OB/GYN practitioner as PCP

Participating Obstetricians are responsible for medical services during the course of the member's pregnancy, and for coordinating testing and referral services. Obstetricians may also provide routine primary care and treatment to pregnant members under their care. Examples of routine primary care may include:

- Treatment of minor colds, sore throat, or asthma
- Treatment of minor injuries
- Preventative health screenings and maintenance
- Routine gynecological care

#### Initial prenatal visit

For purposes of billing and reimbursement, each new pregnancy (270 days) is considered a new patient whether or not the patient has been seen previously by the provider/practice.

#### Prenatal visits

AmeriHealth Caritas Ohio requires the provider to submit the appropriate level evaluation and management (E/M) CPT code from the range of procedure codes used for an established patient for the subsequent prenatal visit(s). The reimbursement for these services shall include, but is not limited to:

- The obstetrical (OB) examination
- Routine fetal monitoring (excluding fetal non-stress testing)
- Diagnosis and treatment of conditions both related and unrelated to the pregnancy
- Routine dipstick urinalysis

#### Delivery

AmeriHealth Caritas Ohio requires childbirth delivery procedures to be reported with weeks of gestation diagnosis (Z3A-Z3A.49). If these codes are billed without a week of gestation diagnosis the claim will be denied.

Authorization may be waived for obstetrical admissions with newborn deliveries exceeding 3 days (72 hours) after vaginal delivery and 5 days (120 hours) after cesarean section.

For Institutional claims-

One of the following diagnosis codes must be included on the claim for reimbursement:

- O80 – Encounter for full-term uncomplicated delivery
- O82 – Encounter for cesarean delivery without indication

For Professional claims-

CPT Code	Description
----------	-------------

59400	Routine obstetric care including antepartum care, vaginal delivery (with or without episiotomy, and/or forceps) and postpartum care
59409	Vaginal delivery only (with or without episiotomy and/or forceps)
59410	Vaginal delivery only (with or without episiotomy and/or forceps); including postpartum care
59514	Cesarean delivery only
59515	Cesarean delivery only; including postpartum care
59612	Vaginal delivery only, after previous cesarean delivery (with or without episiotomy and/or forceps)
59614	Vaginal delivery only, after previous cesarean delivery (with or without episiotomy and/or forceps); including postpartum care
59620	Cesarean delivery only, following attempted vaginal delivery after previous cesarean
59622	Cesarean delivery only, following attempted vaginal delivery after previous cesarean delivery; including postpartum care

## Postpartum

Providers should submit CPT code 59430 for postpartum visit(s).

## Anesthesia

Administration of obstetrical anesthesia using these CPT codes is reimbursable for

- Neuraxial analgesia for vaginal delivery (includes repeated subarachnoid needle placement, drug injection, and necessary epidural catheter replacement during labor); or
- Anesthesia for cesarean delivery.

CPT Code	Description
01958	Anesthesia for external cephalic version procedure
01960	Anesthesia for vaginal delivery only
01961	Anesthesia for cesarean delivery only
01967	Neuraxial labor analgesia/anesthesia for planned vaginal delivery
+01968	Anesthesia for cesarean delivery following neuraxial labor analgesia/anesthesia

For neuraxial labor analgesia, the time unit begins when the analgesic is inserted and ends at delivery. Total duration is limited to two hundred forty minutes (four hours).

*To the extent that any procedure and/or diagnosis codes are specified in this policy, such inclusion is provided for reference purposes only, may not be all inclusive, and is not intended to serve as billing instructions. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by federal, state, or contractual requirements and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.*

## Definitions

### Antepartum

The period of time between conception and the onset of labor.

### Neuraxial Anesthesia

Neuraxial anesthesia and analgesia techniques include spinal, epidural, and combined spinal-epidural.

### Postpartum

The period of time after the delivery of the baby.
